Champions for Social Care Improvement

inspection report

Residential Special School (not registered as a Children's Home)

West Kirby Residential School

Meols Drive West Kirby Wirral CH48 5DH

24, 25, 26th February 2004

Commission for Social Care Inspection

Launched in April 2004, the Commission for Social Care Inspection (CSCI) is the single inspectorate for social care in England.

The Commission combines the work formerly done by the Social Services Inspectorate (SSI), the SSI/Audit Commission Joint Review Team and the National Care Standards Commission.

The role of CSCI is to:

- Promote improvement in social care
- Inspect all social care for adults and children in the public, private and voluntary sectors
- Publish annual reports to Parliament on the performance of social care and on the state of the social care market
- Inspect and assess 'Value for Money' of council social services
- Hold performance statistics on social care
- Publish the 'star ratings' for council social services
- Register and inspect services against national standards
- Host the Children's Rights Director role.

Inspection Methods & Findings

SECTION B of this report summarises key findings and evidence from this inspection. The following 4-point scale is used to indicate the extent to which standards have been met or not met by placing the assessed level alongside the phrase "Standard met?"

The 4-point scale ranges from:

- 4 Standard Exceeded (Commendable)
- 3 Standard Met (No Shortfalls)
- 2 Standard Almost Met (Minor Shortfalls)
- 1 Standard Not Met (Major Shortfalls)
- 'O' or blank in the 'Standard met?' box denotes standard not assessed on this occasion.
- '9' in the 'Standard met?' box denotes standard not applicable.
- 'X' is used where a percentage value or numerical value is not applicable.

INTRODUCTION TO REPORT AND INSPECTION

Residential Special Schools are subject to inspection by the National Care Standards Commission (NCSC) to determine whether the welfare of children (i.e. those aged under 18) is adequately safeguarded and promoted while they are accommodated by the school.

Inspections assess the extent to which the school is meeting the National Minimum Standards for Residential Special Schools, published by the Secretary of State under Section 87C of the Children Act 1989, and other relevant requirements of the Children Act 1989 as amended. Residential Special Schools are not registered as children's homes unless they accommodate, or arrange accommodation for, one or more children for more than 295 days a year.

This document summarises the inspection findings of the NCSC in respect of West Kirby Residential School

The report follows the format of the National Minimum Standards and the numbering shown in the report corresponds to that of the standards.

The report will show the following:

- Inspection methods used
- Key findings and evidence
- Overall ratings in relation to the standards
- Recommended action by the school
- Advisory recommendations on boarding welfare
- Summary of the findings
- Report of the lay assessor (where relevant)
- The Head's response and proposed action plan to address findings

INSPECTION VISITS

Inspections are undertaken in line with the agreed regulatory framework under the Care Standards Act 2000 and the Children Act 1989 as amended, with additional visits as required.

The report represents the inspector's findings from the evidence found at the specified inspection dates.

BRIEF DESCRIPTION OF THE SCHOOL AND RESIDENTIAL PROVISION

West Kirby Residential School is a non-maintained Special School, which provides primary and secondary education for children with social, emotional and behavioural difficulties; medical conditions including aspergers syndrome; and speech, language and communication disorders. The majority of the boys and girls who attend the school are aged 5 to 16 years, and facilities may be extended up to the age of 19 years if it is considered to be in the pupils' best interests.

During the academic year 2002/2003 the school was awarded the 'School Achievement Award' from the Department of Education and Skills, the 'Sports Activemark' award and has been accredited with the 'Healthy Promoting School' (Bronze award) and Careers Award.

The school offers 30 residential places, with a variety of boarding arrangements available depending on the needs of the child, ranging from one to four nights each week. The residential accommodation is divided into four separate groups; three for boys according to their age, and one for girls. All the bedrooms in the boy's groups are single rooms. In the girl's group most of bedrooms are single rooms but some are shared by choice. There are positive links and communication between the school and residential staff. The time after school is seen as an extension of the school day with the same high level of planning and communication that is seen during the school day. Even with this being the case there is a clear distinction made between school time and after school. Children are able to use their free time constructively to pursue leisure and cultural activities and interests.

The school was inspected by OfSTEAD on $12^{th} - 15^{th}$ January 2004. The report findings of the OfSTEAD inspectors were extremely positive and they reported that improvements since the school was inspected in 1999 has been excellent.

PART A

SUMMARY OF INSPECTION FINDINGS

WHAT THE SCHOOL DOES WELL IN BOARDING WELFARE

The school has made significant progress since the last inspection and has acted upon all the recommendations made at this time. A considerable amount of work has been done in developing written policies and procedures that comply with the National Minimum Standards. Many of these policies still need to be approved by the governing body and will be discussed when they meet next in March 2004. The pharmacy inspector commented on the considerable progress in the management of medication in the school.

The school was particularly good in consulting children about the decisions affecting their daily lives and about the running of the school through mechanisms such as the complaints system, the school council and group meetings and on an individual basis through work with members of staff. In addition there was evidence that the school works particularly hard to develop good communication links with pupil's families and gathering their views.

The feedback that the inspector received from children and parents about the school was extremely positive. One pupil said '*It*'s a good school to live in because all the staff go out of their way to help if you have any problems'.

The school and staff respect a child's wish for privacy and confidentiality so far as is consistent with good parenting and the need to protect the child. Children know how and feel able to complain if they are unhappy with any aspect of living in the school. There was evidence to show that the school has systems in place to identify and respond effectively to concerns about child protection. The school has used information technology systems to record and monitor pupils' attendance, and to monitor significant incidents involving pupils.

The inspector observed that relationships between staff and children were positive and based on respect and understanding. The atmosphere around the school was warm and friendly. The inspector saw many examples of staff maintaining safe, consistent and understandable boundaries for children in respect of acceptable behaviour. The inspector found that the school encourages pupils to develop acceptable behaviour through the positive and constructive management of inappropriate behaviour using an incentive scheme and a behavioural support team. The communication and relationship between the care and education staff was commendable.

The planning for children's care was comprehensive and thorough. There were many good examples of how the school provides support to individual children, and assist them prepare to leave the school. The children's files were up to date and well maintained.

The school was efficiently organised and managed. The staff group was skilled and knowledgeable, and well supported. There were opportunities for all staff to develop their skills through training programmes. The operation of the school and the welfare

arrangements for the children were monitored.

WHAT THE SCHOOL SHOULD DO BETTER IN BOARDING WELFARE

The main issue for the school was the need to develop and improve the quality of their written records. The inspector acknowledged that there were some examples of good and detailed recording practice, but this needs to be developed further, and the staff would benefit from written guidance and training in recording skills.

CONCLUSIONS AND OVERVIEW OF FINDINGS ON BOARDING WELFARE

This has been an extremely positive inspection. The school has demonstrated a clear commitment to meeting the National Minimum Standards and to continue to develop its services to meet the needs of the children who attend the school. The inspector observed a high standard of care practices and competence. The feedback about the school from pupils, parents and other professionals has been invariably complimentary. The inspector found many examples of positive outcomes for children.

The inspector would like to thank the principal, head of care, staff and in particular the children for their cooperation and assistance during the inspection.

Is Notification of any failure to safeguard and promote welfare to be made by the National Care Standards Commission to the Local Education Authority or Department for Education and Skills under section 87(4) of the Children Act 1989 arising from this inspection?

NO

Notification to be made to:	Local Education Authority	NO
	Secretary of State	NO

The grounds for any Notification to be made are:

IMPLEMENTATION OF RECOMMENDED ACTIONS FROM LAST INSPECTION

Recommended Actions from the last Inspection visit fully implemented?

If No, the findings of this inspection on any Recommended Actions not implemented are listed below:

No	Standard	Recommended actions	

YES

RECOMMENDED ACTIONS IDENTIFIED FROM THIS INSPECTION

Action Plan: The Head is requested to provide the Commission with an Action Plan, which indicates how recommended action and any advisory recommendations are to be addressed. This action plan will be made available on request to the Area Office.

No	Standard*	Recommended Action
1	RS3	The head of care should provide guidance for pupils and staff on when it may be necessary to search a child's possessions in accordance with NMS 3.11.
2	RS6	The head of care should make sure that recorded risk assessments are carried out regularly in respect of the risk of bullying in accordance with NMS 6.5.
3	RS10	The head of care should make sure that the record of physical interventions is developed further to include the areas included in NMS 10.14.
4	RS14	The head of care should make sure that the recommendations made by the pharmacy inspector during the inspection are implemented.
5	RS27	The principal should make sure that staff members do not begin work at the school until the satisfactory completion of all CRB checks.
6	RS28	The principal should make sure that the school develops and formalises a written staffing policy in accordance with NMS 28.2.

ADVISORY RECOMMENDATIONS

Identified below are advisory recommendations on welfare matters addressed in the main body of the report and based on the National Minimum Standards, made for consideration by the school.

No	Refer to Standard*	Recommendation
1	RS5	It is advisable that the head of care requests copies of the ACPC procedures from each of the placing authorities.
2	RS17RS10	The head of care should provide training and written guidance for staff in relation to case recording to develop staff's recording skills and make sure that records are accurately written.

3	RS14	The principal and head of care should give some consideration to the provision of electronic scales for the medical room, and a therapeutic
		quiet room as part of the physiotherapy service.

Note: You may refer to the relevant standard in the remainder of the report by omitting the 2-letter prefix. E.g. RS10 refers to standard 10.

PART B INSPECTION METHODS AND FINDINGS

The following inspection methods were used in the production of this report

Direct Observation	YES
Pupil Guided Tour of Accommodation	NO
Pupil Guided Tour of Recreational Areas	NO
Checks with other Organisations	
Social Services	YES
Fire Service	YES
Environmental Health	YES
• DfES	NO
School Doctor	NO
Independent Person	NO
Chair of Governors	NO
Tracking individual welfare arrangements	YES
Survey / individual discussions with boarders	YES
Group discussions with boarders	YES
Individual interviews with key staff	YES
Group interviews with House staff teams	YES
Staff Survey	YES
Meals taken with pupils	YES
Early morning and late evening visits	YES
Visit to Sanatorium / Sick Bay	YES
Parent Survey	YES
Placing authority survey	NO
Inspection of policy/practice documents	YES
Inspection of records	YES
Individual interview with pupil(s)	YES
Answer-phone line for pupil/staff comments	NO
Date of Inspection	24/02/04
Time of Inspection	09.15
Duration Of Inspection (hrs.)	26.30
Number of Inspector Days spent on site	3
Number of mapecion Days spend of sile	J

Pre-inspection information and the Head's Self evaluation Form, provided by the school, have also been taken into account in preparing this report.

SCHOOL INFORMATION

Age Range of Boarding Pupils From	8	То	17
NUMBER OF BOARDERS AT TIME OF INS	PECTIO	ON:	
BOYS	21		
GIRLS	7		
TOTAL	28		
Number of separate Boarding Houses	4		

The following pages summarise the key findings and evidence from this inspection, together with the NCSC assessment of the extent to which standards have been met. The following scale is used to indicate the extent to which standards have been met or not met by placing the assessed level alongside the phrase "Standard met?"

The scale ranges from:

- 4 Standard Exceeded
- 3 Standard Met
- 2 Standard Almost Met
- 1 Standard Not Met
- (Commendable) (No Shortfalls) (Minor Shortfalls) (Major Shortfalls)

"0" in the "Standard met" box denotes standard not assessed on this occasion.

"9" in the "Standard met" box denotes standard not applicable.

"X" is used where a percentage value or numerical value is not applicable.

STATEMENT OF THE SCHOOL'S PURPOSE

The intended outcome for the following standard is:

• Children, parents, staff and placing authorities have access to a clear statement of the school's care principles and practice for boarding pupils.

Standard 1 (1.1 – 1.9)

The school has a written Statement of Purpose, which accurately describes what the school sets out to do for those children it accommodates, and the manner in which care is provided. The Statement can be made up of other documents, e.g., Letter of Approved Arrangements and school prospectus, which are required to include specific information.

Key Findings and Evidence	Standard met?	3
The school has a written statement of purpose outlined in	the school prospect	ctus and mission
statement. The statement of purpose accurately reflects t	he overall objectiv	es of the school
and the services that it provides for pupils. It was reviewed	d in September 20	03 and contains
all the information required in NMS 1.3. There was e	vidence that the	governing body
approves the statement of purpose and reviews it at least	annually.	

The inspector found that the school was able to meet the range of needs outlined in the statement of purpose and that the school only admits children whose needs can be met within the function of the school.

The statement of purpose and the school's written policies and procedures clearly apply to both the residential and educational aspects of the school, and identify how all the staff at the school create a continuum of care for the children.

The head of care informed the inspector that the school are in the process of developing a children's guide for each of the residential groups. The inspector read a draft copy of the guide for the senior boys group. This was detailed and informative, and included helpful information about the facilities available in the group, the daily routine, the school code of conduct, and what to do 'if you have a problem', as well as contact numbers for Child Line, NCSC, a Independent Listener, and the school's Help Line for weekends and holidays. The inspector would be interested to see copies of all the children's guides when they are completed.

CHILDREN'S RIGHTS

and the provision of different activities.

The intended outcomes for the following set of standards are:

- Children are encouraged and supported to make decisions about their lives and to influence the way that the school is run. No child should be assumed to be unable to communicate their views.
- Children's privacy is respected and information about them is confidentially handled.
- Children's complaints are addressed without delay and children are kept informed of progress in their consideration.

Standard 2 (2.1 - 2.9)Children's opinions, and those of their families or significant others, are sought over key decisions which are likely to affect their daily life and their future. Feedback is given following consultations.

Key Findings and EvidenceStandard met?4The responses from pupils to the questionnaires showed that they felt that staff asked their
opinions about the school. They referred to the school council and group meetings as formal
structures where consultation takes place and where pupils are able to raise issues and
make decisions about the running of the school. The pupils were able to give a number of
examples of where their opinions have made a difference to how the school is run including
the provision of water machines around the school, a change of uniform for post-16 pupils,

The school has a number of mechanisms to find out pupils opinions, including a complaints book in the dining room, a suggestions box, being involved in school assembles, and there was written evidence that pupil's views were sought following any significant incident. The inspector read the minutes to the school council. This meets each month with two elected representatives from each class. Pupils are elected to the post of Chair, Vice Chair, and Secretary. The minutes showed that the council discussed all aspects of school life.

Meetings take place weekly for each residential group and are documented. The inspector observed the senior boys group meeting. The young people chaired this and they also recorded the minutes. The meeting provided an opportunity for both young people and staff to raise and discuss issues; and decide which activities they wanted to do the following week.

There was written evidence in pupil's files that they participate in decisions about their daily lives on an individual basis through work with their key workers, and make a significant contribution to their annual reviews.

There was evidence that the school works particularly hard to develop good links with pupil's families through home/school agreements and diaries, half termly bulletins giving details of school events, parent's evening and annual reviews, and to include them in decisions about the school and their children's progress. The head of care informed the inspector that parents were invited to contribute to the development of school policies. Responses to the parent's questionnaire showed that parents felt that their opinions were asked their opinions decisions affecting their child, that they were encouraged to visit the school and made to feel welcomed, and had the opportunity to meet with the board of governors. The school was

particularly good at gathering the views of parents. They recorded parent's comments from parent's evening, comments on school reports and about school events, and letters from parents. There was evidence that the school evaluated this feedback.

Standard 3 (3.1 – 3.11)

The school and staff respect a child's wish for privacy and confidentiality so far as is consistent with good parenting and the need to protect the child.

Key Findings and EvidenceStandard met?2All the pupils that responded to the questionnaires stated that they had enough privacy when
using toilets and bathrooms.2

The school has procedural guidelines for staff on privacy and confidentiality in line with NMS 3.2. The pupil's records are safely and securely stored, and remain confidential. The inspector found that staff know how to deal with and share information which they are given in confidence when necessary for child protection. The school has a Code of Practice for Employees When Dealing With Young People covering issues such as private meetings with pupils, performing personal care tasks, physical contact with young people, working with young people of the opposite sex, maintaining appropriate relationships, and dealing with 'crushes'.

Pupils are able to make telephone calls in private and the school provides space for children to meet privately with parents and others. There was evidence on the pupil's files of where restrictions of communication had been agreed with the placing authority.

The school needs to provide guidance for pupils and staff on when it may be necessary to search a child's possessions in accordance with NMS 3.11.

Standard 4 (4.1 - 4.8) Children know how and feel able to complain if they are unhappy with any aspect of living in the school, and feel confident that any complaint is addressed seriously and without delay. Key Findings and Evidence Standard met? 3 There were no complaints about the school recorded in the last twelve months. The pupils who responded to the questionnaires indicated that they knew how to make a complaint if they needed to, and the majority of them said that staff had told them about the complaints procedure. More than half of the pupils stated that they had been told that they could make a complaint to the inspector if they wanted to. The school has a written complaints policy and procedural guidelines in line with NMS 4.3. The head of care informed the inspector that staff have received training on dealing with complaints in staff meetings and supervision and had training on 'listening to children'. The contact telephone numbers for Child Line, the school's Helpline, and NCSC are displayed around the school. The school has produced an information leaflet and comment form for pupils providing advice about making a complaint or suggestion, and what may happen next. The NCSC have not received any complaints about the school. Number of complaints about care at the school recorded over last 12 Х months: Х Number of above complaints substantiated: Number of complaints received by NCSC about the school over last 12 Х months: Х Number of above complaints substantiated:

CHILD PROTECTION

The intended outcomes for the following set of standards are:

- The welfare of children is promoted, children are protected from abuse, and an appropriate response is made to any allegation or suspicion of abuse.
- Children are protected from bullying by others.
- All significant events relating to the protection of children accommodated in the school are notified by the Head of the school to the appropriate authorities.
- Children who are absent without authority are protected in accordance with written guidance and responded positively to on return.

Standard 5 (5.1 - 5.12)

There are systems in place in the school which aim to prevent abuse of children and suspicions or allegations of abuse are properly responded to. These are known and understood by all staff (including junior, ancillary, volunteer and agency staff).

Key Findings and Evidence	Standard met?	3	
There was evidence to show that the school has systems in place to identify and respond to			
concerns about child protection. These were known and u	inderstood by all n	nembers of staff	

concerns about child protection. These were known and understood by all members of staff. All staff including ancillary have received child protection training.

Copies of the local Area Child Protection Committee (ACPC) procedures are kept in the school and available to staff. It is advisable that the head of care requests copies of the ACPC procedures from each of the placing authorities. The school's child protection procedures are consistent with the local ACPC guidelines and have been updated recently to include all the requirements set out in Appendix 1 of the National Minimum Standards. In addition the school has written guidance for staff who are subject to allegations against them.

Number of recorded child protection enquiries initiated by the social services department during the past 12 months:

1

Standard 6 (6.1 - 6.5)

The school has, and follows, an anti–bullying policy, with which children and staff are familiar and which is effective in practice. Where possible children in the school contribute to the development of the policy.

Key Findings and EvidenceStandard met?2The school has an anti-bullying policy and this meets the requirements of NMS 6.2. The
head of care informed the inspector that the policy was currently being further developed.
There was no evidence to suggest that bullying was a significant issue for the school.
Nevertheless, the staff and pupils were aware of bullying as an issue and a topic of
discussion. During the inspection a group of older pupils went to the theatre to see a play
called 'Bully'. They told the inspector that the play had been performed previously in a school
assembly. The issue was also discussed as part of the national curriculum. There was
evidence from the written records and from discussions with staff and pupils that any
incidents of bullying were taken seriously and promptly dealt with.

However, the school should regularly carry out recorded risk assessments in respect of the risk of bullying in accordance with NMS 6.5.

64 %

Standard 7 (7.1 - 7.7)

All significant events relating to the protection of children in the school are notified by the Head of the school or designated person to the appropriate authorities.

Key Findings and EvidenceStandard met?3The school has a system in place to notify the appropriate authorities including the NCSC of
the significant events outlined in NMS 7.2. Since the last inspection the school has
introduced written guidance on the notification of significant events and this meets the
requirements of this standard.

The notifications that have been sent to the NCSC have been appropriate and provided details of the incident and what action was taken. These reports and the written records show that staff in the school promptly notify the child's parent or carers of any serious incident involving the child.

The written records show that there have been no serious incidents necessitating the police being called to the school.

NUMBER OF THE FOLLOWING NOTIFIED TO NCSC DURING THE LAST 12 MONTHS:

- conduct by member of staff indicating unsuitability to work with children
- serious harm to a child
- serious illness or accident of a child
- serious incident requiring police to be called

the past 12 months:	2		

the past 12 months:

CARE AND CONTROL

The intended outcomes for the following set of standards are:

- Children have sound relationships with staff based on honesty and mutual respect.
- Children are assisted to develop appropriate behaviour through the encouragement of acceptable behaviour and constructive staff response to inappropriate behaviour.

Standard 9 (9.1 - 9.8)

Relationships between staff and children are based on mutual respect and understanding and clear professional and personal boundaries which are effective for both the individuals and the group.

Key Findings and EvidenceStandard met?4The inspector observed that relationships between staff and children were positive and
based on respect and understanding. The atmosphere around the school was warm and
friendly. Staff were able to demonstrate clear personal and professional boundaries with
children. Communication between staff and children was positive and any disagreements
were managed reasonably. The inspector saw staff encouraging children to reflect on their
behaviour, and to use negotiating skills.4

The school's Code of Practice for Employees When Dealing With Young People and Code of Practice for pupils clearly outlines the expectations for behaviour. The inspector saw many examples of staff maintaining safe, consistent and understandable boundaries for children in respect of acceptable behaviour. The emphasis was on praising positive behaviour and achievements.

Staff have received training in positive care and control. The school uses Protecting Rights in Care Environment (PRICE) techniques. The school has approved PRICE trainers and each member of staff undergoes refresher training annually.

There was evidence that pupils trusted staff and had some choice of which staff offered them support. One young person told the inspector that they feel able to approach most members of staff for help and support, but they had certain members of staff they usually go to if they had any difficulties.

Standard 10 (10.1 - 10.26)

Staff respond positively to acceptable behaviour, and where the behaviour of children is regarded as unacceptable by staff, it is responded to by constructive disciplinary measures which are approved by the Head of Care.

Key Findings and EvidenceStandard met?2The inspector found that the school encourages pupils to develop acceptable behaviour
through the positive and constructive management of inappropriate behaviour. The school's
written guidance on care and control clearly outlines the circumstances under which physical
intervention measures may be used in accordance with NMS 10.10, and is consistent with
government guidance on approved methods of physical intervention. The policy lists
prohibited measures of control in line with NMS 10.6. It also emphasises the need to
positively reinforce children's achievements and acceptable behaviour.

The school has recently set up a Behavioural Education Support Team (BEST) to monitor pupil's behaviour and offer support to pupils who may be experiencing some difficulties. This includes support to pupils who are finding it difficult to cope in class or assisting pupils settle into the school. The school has a room where pupils can go to receive support from the educational support mentor. The room was decorated in a way to provide a relaxed and calm environment. These sessions are usually timetabled and provide the opportunity for pupils to carry on with their education in a quiet environment and preventing them from falling behind. In addition it provides the opportunity for pupils to discuss any concerns or issues that may be troubling them. The BEST team is made up of members of the education and care staff, supported by the school's educational psychologist, and is involved in the development of the school's care and control policy. This is a positive development and the mentor informed the inspector that the team were achieving some pleasing results.

The school has adopted an incentive scheme, the 'E' system, where 'E' stands for effort or excellence, and pupils are able to earn 'Es' related to academic, social and behavioural targets. The total number of 'Es' gained over a week determines their choice of activities on 'options' afternoons and evenings. The inspector examined the recording of the system and spoke to staff and children about it. The system sets clear and achievable targets for individual children depending on their age, needs and level of understanding. Staff told the inspector that clear explanations are given to children about why they were awarded an 'E' and likewise why they didn't receive one. The children were aware of how the system worked and what they needed to do to get an 'E'. They felt that the system was fair and told the inspector if they didn't get enough 'E's for an 'option' they are able to do another activity.

The inspector examined the sanction records for each of the residential groups. These were all kept in a bound and numbered book containing a list of permitted sanctions. These records were kept in line with NMS 10.9. Generally the record of each sanction was documented in detail, but the inspector found that in some cases the recording of the details of the inappropriate behaviour used generalised terms such as 'behaviour' or 'rudeness to staff' and should instead describe what actually happened. There was some evidence that staff were monitoring the effectiveness of imposing sanctions. The inspector found that the sanctions used by staff were reasonable and proportionate. The responses to the pupil questionnaires showed that a large majority of children felt that the punishments used in the school were fair.

The school provides the provision of training for staff in safe and appropriate physical intervention techniques, the circumstances when they can be used and training in reducing

or avoiding the need to use physical intervention.

The inspector examined the written record of physical intervention on a child. This was maintained and monitored by the BEST team. The written record doesn't contain a section to document details of the behaviour requiring use of physical intervention, the effectiveness and consequences of the physical intervention, and any injuries caused to or reported by the child or any other person. The record should be developed further to include these areas in line with NMS 10.14. The Principal had signed each entry in the record.

The deputy head of care informed the inspector that the school used information technology to set up a database to record all incidents of physical intervention, and that this included all the areas required to be documented in NMS 10.14. They are able to use the database to monitor and evaluate the use of physical interventions. This system was a positive development, but the school still maintain a written record as specified in the standard.

QUALITY OF CARE

The intended outcomes for the following set of standards are:

- Children experience planned and sensitively handled admission and leaving processes.
- The school's residential provision actively supports children's educational progress at the school.
- Children have ample opportunity to engage in purposeful and enjoyable activities both within school and in the local community.
- Children live in a healthy environment and the health and intimate care needs of each child are identified and promoted.
- Children are provided with healthy, nutritious meals that meet their dietary needs.
- Children wear their own clothing outside school time, can secure personal requisites and stationery while at school, and are helped to look after their own money.

Standard 11 (11.1 - 11.6)

Admission and leaving processes are planned and agreed with the child – and as appropriate, with parents and carers and placing authorities – as far as possible and handled with sensitivity and care by those concerned.

Key Findings and EvidenceStandard met?4The school has a clear procedure for introducing children to the school in accordance with
this standard. The inspector examined the information that the school provides for children
and their parents before they start at the school, and the information that the school requires
from the parents. This was comprehensive and thorough. The children's files show that the
school gathers a great deal of information child relevant to the care and education of the
child in line with NMS 11.3. The Special Educational Needs Coordinator (SENCO) informed
the inspector that they review how a child is settling after starting at the school and assess
whether the school will be able to meet the child's needs. In addition, the BEST team may
become involved to assist a child settle into school if necessary. This may be in cases where
children are finding it difficult to adjust to their new environment, for example, where a child
comes to the school following periods when they have been out of education.

There was evidence that children leave the school in a planned and structured way. Children receive support and guidance to assist them in moving on, and the school works closely with parents, placing authorities and other agencies in this process.

Standard 12 (12.1 - 12.7)

Care staff and the school's residential provision and activities actively contribute to individual children's educational progress, and care staff actively support children's education, ensuring regular attendance, punctuality and a minimum of interruption during the school day.

Key Findings and EvidenceStandard met?4The communication and relationship between the care and education staff was
commendable. Information about pupil's progress and needs was shared appropriately and
effectively to ensure their needs are met. Discussions with care staff showed that they were
familiar with children's educational needs and progress, including the targets in their
Individual Education Plan (IEP) and that they inform teaching staff of any information that
would assist supporting the child during school time.4

The inspector observed care staff contributing to the annual review of the statement and how they participate in the implementation of the IEP. The written records showed how care staff used individual key worker sessions with children to work on targets in their IEP. This, for example, included issues around personal hygiene, social skills, and assisting children in their preparation for independent living.

The inspector saw care staff supporting and encouraging children complete their homework. The daily routines in the residential groups are conducive to study. Children have access to books and educational materials that are appropriate to their age and educational needs, and they were able to gain access to school facilities such as the library out of school hours.

Standard 13 (13.1 - 13.9)		
Children have ample opportunity to engage in purposeful and enjoyable activities		
both within the school and in the local community.		
Key Findings and Evidence	Standard met?	4
There was evidence to show that children had the opportunity to participate in a wide range of activities both in the school and in the local community. This included sporting activities, cooking, going shopping, swimming, attending local youth clubs, and cultural events including trips to the theatres. The children have a choice of activities appropriate to their age and needs, and there were many examples of children being able to pursue particular interests and talents. The inspector observed the senior boys using their group meeting to plan the organised activities for the following week. There was a suitable balance between organised activities and free time during the evening.		
The school has risk assessments for all the activities they offer, both inside the school and out in the community including for school trips. There was particularly detailed individual risk		

The school has risk assessments for all the activities they offer, both inside the school and out in the community including for school trips. There was particularly detailed individual risk assessments for each child going swimming, and the school has written guidelines for staff who supervise this activity.

re needs. Ny Findings and Evidence	Standard mat2	0
ey Findings and Evidence	Standard met?	2

Standard 15 (15.1 - 15.15)

Children are provided with adequate quantities of suitably prepared wholesome and nutritious food, having regard to their needs and wishes, and have the opportunity to learn to prepare their own meals. Where appropriate special dietary needs due to health, religious persuasion, racial origin or cultural background are met, including the choice of a vegetarian meal for children who wish it.

Key Findings and EvidenceStandard met?4The majority of the children who responded to the pupil questionnaires talked positively
about the food. A record of the menus served was kept. The inspector observed breakfast,
lunch, teatime, and supper, and found that all the meals were well-managed, orderly and
social occasions. The meals were healthy, varied and nutritious. Meals with drinks were
provided at reasonable set times.

Children have a choice of main course at each meal, and there was evidence from the children, and the catering manager that children are consulted over the planning of menus, and children are encouraged to state their preferences for food and drink, and these are taken into account. In addition, a comments book was kept in the dining room and children are encouraged to express their views about the food. Advice had also been taken from a dietician on the nutritional value of the meals, and the school was developing a healthy eating project. This included the provision of fresh fruit and dried fruit at break times instead of sweets and biscuits. The catering manager informed the inspector that they try to encourage children to try different things through theme days where they prepare meals from different cultures and involve children in the planning and advertising of these meals. The school also celebrates cultural events such as Chinese New Year and Shrove Tuesday.

The dining rooms and their furnishings are suitable for the numbers and needs of children and staff using them. All the staff involved in preparing food have received training in safe food handling and hygiene. The catering practices, facilities and equipment have been recently inspected.

Standard 16 (16.1 - 16.7)

Children are provided for adequately on an individual basis and encouraged to exercise their own preferences in the choice of clothing and personal requisites. Children who require assistance to choose what they wear and/or how they spend their money are provided with the assistance they need, in a way which maximises their choice.

Key Findings and Evidence	Standard met?	3
The inspector observed that children were able to wear	their own clothing	outside school
time. They were able to purchase personal requisites and	toiletries for their e	xclusive use

There was evidence in key worker reports that staff provide children with advice on personal hygiene, the use of toiletries, and sanitary protection based on their age, understanding and needs.

Children bring in pocket money from home and this can be held in safekeeping for them. The responses from the pupils' questionnaires showed that all the children who replied were able to choose how to spend their own money.

CARE PLANNING AND PLACEMENT PLAN

The intended outcomes for the following set of standards are:

- Children have their needs assessed and written plans outline how these needs will be met while at school.
- Children's needs, development and progress is recorded to reflect their individuality and their group interactions.
- There are adequate records of both the staff and child groups of the school.
- In accordance with their wishes, children are able and encouraged to maintain contact with their parents and families while living away from home at school.
- Children about to leave care are prepared for the transition into independent living.
- Children receive individual support when they need it.

Standard 17 (17.1 - 17.8)

There is a written placement plan specifying how the school will care for each boarding pupil in accordance with his or her assessed needs, the school cares for that child in accordance with that plan, monitors progress in relation to that plan, and updates that plan as necessary.

Key Findings and Evidence		Standard met?	3
The inspector examined a sample of pupil's files	ΔII	of the files conta	ined the child's

The inspector examined a sample of pupil's files. All of the files contained the child's statement of special educational needs, annual reviews of the statement, individual care plans, and individual educational plans. These documents contained all the relevant information required in NMS 17.1, 17.2 & 17.5. The residential care plans were very detailed based on a thorough assessment of needs, and including information gathered from parents and carers, and children. The files contained pupil pen pictures completed by the children about themselves.

Each child has a key worker within the residence that provides individual guidance and support to the child. The inspector observed key workers undertaking work with individual children such as helping children develop their living skills as identified in their care and educational plans. There was evidence of a great deal of positive work being carried out with the children, and this was documented in key worker reports. However, the quality of these reports varied. Many of them very extremely thorough in detailing the work undertaken with the child, and how this related to the plan, and included some evaluation of the child's progress. But some reports were less detailed, and some were not signed and dated by the author. Also in some of the reports the language was not specific enough and used terms, for example, like 'poor behaviour' or 'melodramatic' instead of recording the actual behaviours that were observed. It is recommended that the head of care provide training and written guidance for staff in relation to case recording.

There was evidence from the children's files to show that staff attend annual reviews and statutory reviews and produce reports on children's progress. The inspector attended an annual review and observed the staff contributing effectively to the meeting. The member of staff had prepared a detailed written report and presented this verbally. They contributed effectively to the review of the child's plan and in identifying the plan of work with the child in the longer-term. The educational psychologist who attended the review informed the inspector that the school was very supportive to the pupil and their parents, and commented

positively on the thoroughness of the school's reports and plans for children.

Standard 18 (18.1 - 18.5)

Each child has a permanent private and secure record of their history and progress which can, in compliance with legal requirements for safeguards, be seen by the child.

Key Findings and EvidenceStandard met?3The inspector found that pupils have a permanent record of their development and progress.
They are securely stored and on the whole well maintained, and included all the information
outlined in NMS 18.2.3

Standard 19 (19.1 - 19.3)

The school maintains clear and accurate records on the staff and child groups of the school, and major events affecting the school and children resident there.

Key Findings and EvidenceStandard met?3The inspector examined the school's records and found that it keeps appropriate records
including a children's and staff register, the menus served, a log of all the accidents
occurring to children, staff duty rosters, and a log of daily events, including the names of
visitors to the school and the reasons for the visit.3

The inspector examined a sample of staff personnel files and found that they contained all the information required under this standard.

Standard 20 (20.1 - 20.6)

Subject to their wishes, children are positively encouraged and enabled by the school to maintain contact with their parents and other family members (unless there are welfare concerns) while living at school.

Key Findings and EvidenceStandard met?3The written records showed that staff were in regular contact with parents by telephone and
by letter, and that staff contact parents about any welfare issues relating to their children.
The parents and carers who completed a questionnaire confirmed this. Children were able to
have telephone contact with their parents. There are facilities for children to meet parents or
other visitors in private and comfortable surroundings.3

Any restrictions on contact with parents or other persons imposed by the placing authority or court were implemented and accurately documented in the pupil's records.

Standard 21 (21.1 - 21.2)

Where a pupil is in care and will be leaving care on leaving the school, the school agrees with the young person's responsible authority what contribution it should make to implement any Pathway or other plan for the pupil before the pupil leaves school. These arrangements are in line with that young person's needs, and the school implements its contribution where feasible from at least a year before the pupil is expected to leave care or move to independent living. The school works with any Personal Advisor for the child.

Key Findings and EvidenceStandard met?3There was evidence from the care plans, individual care plans and annual reviews that the
school was actively involved in developing pupils living skills and preparing them for moving
on to a college placement, and more independent living.3

The inspector met with the member of the teaching staff who has responsibility for careers. They informed the inspector that in Year 9 a transition plan is formally set up for each pupil at their annual review. The transition plan included assessment and action plans for the pupils needs in the following areas: health, practical skills, accommodation, financial support, emotional and life skills, and education, training and employment. Following Year 9 this plan is reviewed at the annual review. The process includes care and teaching staff, and workers from Connextions, health, and social services, as well as the child and their parents or carers. This planning process was evident from the minutes from annual review meetings and key worker reports on pupils' files. The files also showed that the school worked with social services in the development of pathway plans for looked after children at the school.

The inspector found from the records, observations, and discussions with staff and children that children had opportunities to develop knowledge and skills needed for their likely future living arrangements. This included developing budgeting skills through shopping, socialisation in the local community, and the development of personal care, organisational and living skills such as making snacks, preparing meals and using laundry facilities.

Standard 22 (22.1 - 22.13)

All children are given individualised support in line with their needs and wishes, and children identified as having particular support needs, or particular problems, receive help, guidance and support when needed or requested.

Key Findings and EvidenceStandard met?4There was evidence in the written records, in discussions with staff and pupils, and observed
during the inspection, of children receiving individual support appropriate to their needs and
wishes and feelings. The school works hard on developing the social skills of all the pupils
and encouraging their involvement in social groups, both within the school and in the local
community. There were particularly good examples of staff putting systems in place to
encourage pupils to take turns in activities and developing negotiation skills.

Children told the inspector that they are able to approach any member of staff with personal concerns. There was evidence from discussions with staff and from the written records that children undergoing times of personal stress are supported. The key worker reports provided many examples of good practice such as using role-play to help a child use more socially acceptable behaviour, working with a child to reflect on certain behaviours and the consequences of them, and to develop living and social skills.

The inspector found a good level of communication between teaching and care staff and as a result there was evidence of a continuity of care in supporting pupils appropriate to their needs. The pupils also receive support from learning mentors on specific issues and needs. There was evidence of staff cooperating in implementing programmes associated with specialist services including speech therapy and physiotherapy. Such therapeutic techniques are only used with children if specified in the child's care plan and agreed by the parents and placing authority, and are only carried out by suitably qualified persons or on their direction or supervision.

The inspector found evidence that there were opportunities for children to receive support on issues such as identity, racial and cultural background, as well as appropriate personal, health, social and sex education.

Children in the school have access to people who they may contact directly about personal problems or concerns at the school. They have access to advocates, national help lines, the school's own help line, and are able to meet with the school governors who regularly visit the school on behalf of the governing body.

PREMISES

The intended outcomes for the following set of standards are:

- Children live in well designed, pleasant premises, providing sufficient space and facilities to meet their needs.
- Children live in accommodation that is appropriately decorated, furnished and maintained to a high standard, providing adequate facilities for their use.
- Children are able to carry out their ablutions in privacy and with dignity.
- Children live in schools that provide physical safety and security.

Standard 23 (23.1 - 23.9)

The school is located, designed and of a size and layout that is in keeping with its Statement of Purpose. It serves the needs of the children and provides the sort of environment most helpful to each child's development, and is sufficient for the number of children.

Key Findings and Evidence Standard met?	3
---	---

The location, design, and size of the school were appropriate to meet the needs of the pupils and in accordance with its statement of purpose. The residence and the grounds provide a pleasant environment for young people. There were no outstanding requirements or recommendations relating to the school from the fire service and environmental health authority.

The school's premises are not also used for activities that compromise or have an adverse effect on the care and privacy of the pupils. There was evidence from the records and from observation that the school was taking effective precautions to maintain the security to the school. During the inspection the school was undertaking building work. There was a plan in place to make sure that this work didn't impact adversely on the welfare of any of the children, and a procedure for the supervision of contractors when they needed to work near any of the children.

The school uses an electronic monitoring system in the residential accommodation at night to alert staff if children need support or assistance. This system has been agreed with placing authorities and parents.

The school maintains appropriate links with the local community, and makes good use of local recreational facilities, youth clubs, and amenities.

Standard 24 (24.1 - 24.19)

The school provides adequate good quality and well-maintained accommodation for boarding pupils, which is consistent with their needs.

Key Findings and EvidenceStandard met?3The school provides good quality and well-maintained accommodation for the children and
was appropriate to their needs. The residential accommodation and facilities were homely
and were decorated and furnished to a high standard. They were tidy and standard of
cleanliness was excellent. The interior and exterior of the school was in a good state of
structural repair. Damage to the premises was repaired promptly. The grounds and play
areas were well maintained and safe.3

The sleeping arrangements for pupils were in keeping with NMS 24.5. All pupils are encouraged to personalise their rooms. Each child had sufficient storage for clothes and belongings. There was space for private study and lockable facilities for pupils to store personal possessions depending on the needs of each pupil.

Staff have designated sleep-in rooms and bathrooms, which are located close to children's rooms to respond to children's night time needs.

 Standard 25 (25.1 - 25.7)

 The school has sufficient baths, showers and toilets, all of good standard and suitable to meet the needs of the children. The school has appropriate changing and washing facilities for incontinent children where necessary.

 Key Findings and Evidence
 Standard met?
 3

 The bathroom and lavatory facilities in the residential accommodation were of a high standard, and suitable to meet the needs of the children and enable them to carry out their personal care in privacy with dignity. There was sufficient numbers of baths, showers and toilets in each group to more than meet the minimum standard. Staff and adult visitors use separate toilets and bathroom to those used by the children.

Standard 26 (26.1 - 26.10)

Positive steps are taken to keep children, staff and visitors safe from risk from fire and other hazards, in accordance with Health and Safety and Fire legislation and guidance.

Key Findings and EvidenceStandard met?3There was evidence from the written records that the school takes positive steps to keep
children, staff and visitors safe from risks and hazards in accordance with health and safety
and fire legislation. There was no unnecessary hazard apparent in the school and grounds.
Gas installations, electrical equipment and installations and boilers were appropriately
inspected and serviced and certificates were available for inspection.3

The school has excellent guidance on risk assessments. Generic risk assessments have been carried out in relation to the premises, the residential accommodation, activities both inside the school and in the community, the use of the multi-gym, transport, playground, the use of the school minibus, library, and bathroom and toilets. There was evidence of risk assessments being reviewed and adapted as necessary.

The fire precaution records show that fire drills and the regular testing of emergency lighting, fire alarms, and fire fighting equipment take place as required by the Fire Authority. The school has involved the Fire Authority and building control in all the building alterations taking place in the school.

STAFFING

The intended outcomes for the following set of standards are:

- There are careful selection and vetting of all staff, volunteers, and monitoring of visitors to the school to prevent children being exposed to potential abusers
- Children are looked after by staff who understand their needs and are able to meet them consistently.
- Children are looked after by staff who are trained to meet their needs.
- Children are looked after by staff who are themselves supported and guided in safeguarding and promoting the children's welfare.

Standard 27 (27.1 - 27.9) Recruitment of all staff (including ancillary staff and those employed on a contractual/sessional basis) and volunteers who work with the children in the school includes checks through the Criminal Records Bureau checking system (at Standard or Enhanced level as appropriate to their role in the school), with a satisfactory outcome. There is a satisfactory recruitment process recorded in writing.

Key Findings and Evidence	Standard met?	2
The school has a clear and thorough system for	recruiting staff and	volunteers. The
inspector examined a sample of staff personnel fi	iles and these inclu	ded the all the
information outlined in NMS 27.2.		

However, the inspector found that a member of staff had started work at the school without an enhanced Criminal Records Bureau (CRB) disclosure. The head of support services informed the inspector that this person had completed an application for a disclosure but there had been a delay in processing it because the CRB needed further information. This being the case, and given that all the other recruitment checks had been carried out, they agreed for the person to start work on the condition that they were supervised at all times. As discussed during the inspection NMS 27.7 requires that staff members do not begin work at the school until the satisfactory completion of all checks and receipt of references. Exceptionally a member of staff may begin if some references/checks are outstanding, but all CRB checks must have been completed.

The school has a robust system for vetting visitors to the school. All visitors have to sign in at reception and carry visitor identification.

Total number of care staff:	20	Number of care staff who left in last 12 months:	2
-----------------------------	----	--	---

Standard 28 (28.1 - 28.13)

The school is staffed at all times of the day and night, at or above the minimum level specified under standard 28.2. Records of staff actually working in the school demonstrate achievement of this staffing level.

Key Findings and Evidence Standard met? 2 The inspector examined the staff rosters. There was sufficient staff in place to meet the minimum staffing requirements during day and night appropriate to fulfil the school's statement of purpose and the needs of individual children. There was evidence in the records that the staffing levels were adjusted to meet the specific needs and numbers of children. There was a written record of which children and adults are sleeping in the residence each night available for both children and staff.

The school now needs to develop and formalise a written staffing policy in accordance with NMS 28.2 as follows:

- The number of care staff required to be on duty by day (which may include different • required numbers for different circumstances), in the evenings and during weekends,
- The number of care staff required to be on duty by night, and whether they are • required to be waking or sleeping in,
- The arrangements for managing the staff on duty group by day and night,
- The arrangements for calling senior staff support if required.

Standard 29 (29.1 - 29.6)

Staff receive training and development opportunities that equip them with the skills required to meet the needs of the children and the purpose of the school.

Key Findings and Evidence

Standard met? 3 The school has recently appointed a member of staff to act as Continuous Professional Development (CPD) co-ordinator, who has responsibility for training and staff development. This is a positive development and shows the school's commitment to professional development and making sure that staff have access to continuing training in child care. Programmes of training are available covering the issues outlined in Appendix 2.

The CPD co-ordinator informed the inspector that staff have personal development plans. The inspector looked at an example and the range of training opportunities available to staff. This included issues relating to the specific needs of the children in the school, such as autism spectrum disorders, aspergers syndrome, aspergers, relationships and sexuality, managing conflict, and communication techniques such as social stories and comic strips.

A new member of staff outlined their induction programme for the inspector. This was thorough and met the requirements of NMS 29.2. Other staff informed the inspector that they had a lot of opportunities for training both internally and externally, and had the opportunity to pursue training programmes in areas they were interested in as well as relating specifically to their jobs.

Standard 30 (30.1 - 30.13) All staff, including domestic staff and the Head of the school, are properly accountable and supported.

Key Findings and Evidence	Standard met?	3
The inspector found that the school had a clear organisational structure and the staff were		
accountable and said that they felt were supported. Staff supervision was taking place in		
accordance with NMS 30.2, 30.3 and 30.4, and there were suitable arrangements for the		
supervision of the head of care. In addition to formal supervision, the inspector observed that		
staff received a lot of informal guidance and support from their managers and colleagues.		

The Principal informed the inspector that the school carries out staff appraisals, and were currently employing a consultancy to undertake a staff audit, and they were planning to introduce a performance management system.

Each member of staff has a copy of Employees Handbook Procedures and Policies, and have access to written guidance as outlined in Appendix 3. In addition staff have received a written job description relating to the school statement of purpose. The staffing rosters were organised to provide opportunities for staff to meet together on a daily basis, and for regular monthly team meetings. These meetings are documented and records kept.

ORGANISATION AND MANAGEMENT

The intended outcomes for the following set of standards are:

- Children receive the care and services they need from competent staff.
- Children enjoy the stability of efficiently run schools.
- The governing body, trustees, local authority, proprietor or other responsible body monitors the welfare of the children in the school.

Standard 31 (31.1 - 31.17) The school is organised, managed and staffed in a manner that delivers the best possible childcare.			
Key Findings and Evidence	Standard met?	3	
The inspector found that the school is managed in an e evidence of excellent organisational skill and compete requirements under this standard.		•	
Percentage of care staff with relevant NVQ or equivale qualification:	ent child care	45 %	

Standard 32 (32.1 - 32.5)

The National Care Standards Commission is informed within 24 hours if a receiver, liquidator or trustee in bankruptcy becomes responsible for the school. Such persons on becoming responsible for the school have ensured that the school continues to be managed on a day to day basis by a Head who meets recruitment and qualification requirements for a Head under these Standards. Such a temporary Head must make sure that the operation of the school meets the requirements of these standards in relation to the day to day running of the school.

Key Findings and EvidenceStandard met?3The inspector found evidence in the written records and from speaking to staff and members
of the management team that the performance of the school was monitored in line with this
standard.1

Standard 33 (33.1 - 33.7)

The governing body, trustees, local authority, proprietor or other responsible body receive a written report on the conduct of the school from a person visiting the school on their behalf every half term.

Key Findings and EvidenceStandard met?4The governing body have nominated two governors to visit the school at least once every
half term to complete a written report on the conduct of the school. The inspector read
copies of the reports that they have completed. These governors have visited the school on
four occasions in line with NMS 33.2, and at different times of day. The reports were
thorough and detailed and showed evidence that the were examining the records outlined in
NMS 33.3, inspecting the physical condition of the building, furniture and equipment, and
meeting staff and pupils, and offering pupils the opportunity to talk privately to them. The
reports also made recommendations for actions to remedy any identified deficiencies.

The inspector met with the governor visitors, and was please to find that they were making a commitment to visit the school frequently, and to spend time with the children to find out their views and any concerns. This included having meals with the children and joining in with activities.

PART C

LAY ASSESSOR'S SUMMARY

(where applicable)

Lay Assessor

Date

PART D HEAD'S RESPONSE

D.1 Head's comments/confirmation relating to the content and accuracy of the report for the above inspection.

We would welcome comments on the content of this report relating to the Inspection conducted on 24th February 2004 of West Kirby Residential School and any factual inaccuracies:

Please limit your comments to one side of A4 if possible

Action taken by the NCSC in response to Head's comments:

Amendments to the report were necessary

Comments were received from the provider

Head's comments/factual amendments were incorporated into the final inspection report

Head's comments are available on file at the Area Office but have not been incorporated into the final inspection report. The inspector believes the report to be factually accurate

Note:

In instances where there is a major difference of view between the Inspector and the Head both views will be made available on request to the Area Office.

D.2 Please provide the Commission with a written Action Plan by 16th April 2004, which indicates how recommended actions and advisory recommendations are to be addressed and stating a clear timescale for completion. This will be kept on file and made available on request.

Status of the Head's Action Plan at time of publication of the final inspection report:

Action plan was required	YES
Action plan was received at the point of publication	YES
Action plan covers all the statutory requirements in a timely fashion	YES
Action plan did not cover all the statutory requirements and required further discussion	
Provider has declined to provide an action plan	
Other: <enter details="" here=""></enter>	

D.3 HEAD'S AGREEMENT

Head's statement of agreement/comments: Please complete the relevant section that applies.

D.3.1 I Mr Gareth Williams of West Kirby Residential School confirm that the contents of this report are a fair and accurate representation of the facts relating to the inspection conducted on the above date(s) and that I agree with the recommended actions made and will seek to comply with these.
