

## **TellUs2 Questionnaire Summary Sheet**

## **Kingston Upon Hull**

Issue date: November 2007

#### **Tellus2 Survey**

The TellUs2 survey was a survey of children and young people across England, asking their views about their local area, and including questions covering the five Every Child Matters outcomes. The survey was carried out in Spring 2007. A sample of schools were selected within each local authority, spread across the different types of schools in each area. The schools were then provided with guidance detailing how to select pupils to take part within the school.

This summary presents the questions in the same way they were presented to respondents. The questions were developed through cognitive testing with children, to ensure they understood the questions and answered them in a meaningful way. This means that some of the questions may not give data consistent with 'standard' definitions, for example, self-defining a disability.

The responses from the survey were weighted to ensure that the summary data at local authority and national level is representative of the population of Year 6, 8 and 10 children within that area in terms of the following characteristics: gender, age, proportion of children eligible for free school meals in the school (as a proxy for deprivation) and type of school. Population data for 2006 from the Pupil Level Annual School Census (PLASC) was used to derive the weights, and the number of children attending Pupil Referral Units is obtained from the 2006 School Level Annual School Census (SLASC).

#### The summary report

The summary report provides data for the selected questions at local authority level and national level. Where insufficient numbers of pupils or schools took part in a local authority, their results aren't presented at local authority level. Where there are insufficient responses in one age group, the local authority summary report excludes this age group only. Results have been reported for a local authority wherever possible, where there are sufficient responses to provide some useful evidence. However, in some cases the response rate is relatively low. This should be taken into account when interpreting the results. All responses are included in the national data.

#### Sample characteristics (Section 1: About you)

This section gives details of the demographic characteristics of respondents to the survey (i.e. unweighted sample information). The rest of the survey data has been weighted, to adjust for any disproportionality between the sample and the population.

The five Every Child Matters Outcome sections (2: Be healthy, 3: Stay safe, 4: Enjoy and achieve, 5: Make a positive contribution, 6: Achieve economic well-being)

Data at local authority level within these sections of the report has been weighted to take account of differences from our sample population to the local authority population in terms of gender, age, type of school and free school meals eliqibility (as a proxy for deprivation).

Where there is a significant difference between the local authority figure and the national figure, the figure is highlighted bold. This will indicate that the result obtained by this analysis is significantly different to the national average (at the 95% level). Where it is clear that there is a positive or negative outcome of the significant difference between the local authority figure and the national figure, the figure is highlighted either red or green. Local authorities with incomplete weighted data for all year groups have not had significance testing applied. This is due to the unequal basis of comparison between the local authority and national figures.

Questions which were only asked of secondary school children are identified after the question as such (YEAR 8 & 10 ONLY).

Don't know	10	8

Note: Figures in bold indicate that the local authority figure is significantly different from the national average, at the 95% confidence level. If the difference indicates a positive outcome for children and young people in the local authority then the local authorities' figure is also coloured green. If it indicates a negative outcome then it is coloured red. If there is a difference but it does not necessarily mean a positive or negative outcome then the local authority figure is bold but coloured black. Unweighted data in the 'About You' section has not had significance testing applied.
