Monitoring visit

Inspected under the social care common inspection framework

Information about this children's home

This privately owned home is registered to accommodate up to six young people who have social and/or emotional difficulties.

The registered manager has been in post since November 2019 and was registered with Ofsted on 12 June 2020.

Inspection date: 19 August 2020

This monitoring visit

Ofsted carried out a monitoring visit to the home on 19 August 2020. This visit was undertaken in response to concerns identified in notifications and through complaints received by Ofsted about the home.

At the time of the monitoring visit, two children were living in the home. However, a management review of the care provided to children had resulted in the decision to move both children to other homes operated by the provider. Both children were imminently due to move.

Inspectors found that the staff do not have the skills and experience to manage children's behaviour, and incidents escalate because staff do not use effective de-escalation techniques to manage incidents in the home. Conflict management is not effective and there is no use of restorative practice to improve children's sense of personal responsibility. As a result, children do not feel safe living in this home, and this is reflected in their escalating behaviour.

Staff do not provide children with clear boundaries and, therefore, children do not learn what is safe and acceptable. The inspectors found that the care provided to children was inconsistent and was dependent on which staff were working in the home. Staff have not worked collaboratively, and consequently children have not been provided with consistency or stability.

The registered manager has ensured that comprehensive risk assessments are in place for each child. Despite having detailed plans, staff have failed to follow these risk assessments. For example, when children go missing from the home, the police should be contacted after 20 minutes. However, on several occasions, staff have not followed this and children have been placed at increased risk because of a delay in notifying the police. This has resulted in young children being missing from the home sometimes overnight and in a very rural location, where there are numerous risks, including access to farming machinery and a local canal.

Staff undertake key-work sessions with children. However, this is reactive to incidents rather than meeting the child's needs as outlined in their care plan. The registered manager has failed to monitor and review key work and staff have not been given support and guidance about undertaking planned work with children. This is a missed opportunity to engage children in work which is meaningful and helps them to develop positive relationships with peers and staff.

The registered manager has ensured that the records of physical intervention are robust and that debriefs have been undertaken with staff and children. However, other aspects of behaviour management have not been reviewed for effectiveness. The inspectors found that staff use consequences with children which do not reflect the behaviour and have little or no impact. Children do not benefit from a consistent approach to behaviour management and do not learn about how to manage their behaviour and feelings safe.

The home has experienced a turbulent period and considerable damage has been caused through violent and aggressive incidents. Managers have ensured that repairs to the home have been undertaken swiftly.
