

Compliance action taken for childcare provision

Ref: EY432414/4586304

Date: 12 October 2020

Summary of outcome

All early years providers must meet the legal requirements in the [Statutory framework for the early years foundation stage](#). If we find that a provider is not meeting the requirements, we can take action to ensure they put matters right.

On 22 September 2020, the provider notified us of a serious accident.

On 5 October 2020, we carried out a regulatory visit and found that the provider had taken action to improve the risk assessments and supervision in the garden. They had also reviewed and strengthened a range of policies, including those for responding to accidents and incidents. We found that the provider was not meeting the requirement regarding information and records. We have issued an action for the provider to take within the timescales set out. The provider will be able to give parents further information about this.

Action needed by 30 October 2020:

- provide more support for staff to recognise the importance of ensuring that information included in required records is clear and accurate.

3.68 Information and Records

The provider has appropriately addressed this action. The provider is still registered with Ofsted.

Publication of compliance action

We aim to ensure that the welfare of children and young people is protected in the services we regulate. The Childcare Act 2006 and accompanying regulations set out our responsibilities to regulate childminders and childcare providers. This includes the enforcement powers we have in relation to those registered providers who do not comply with the requirements for registration.

We publish details of any actions we take, or the childminder or childcare provider takes to bring about compliance with requirements on our website for a period of five years.

For further information please read the Early years compliance handbook which can be found here at www.gov.uk/government/publications/early-years-provider-non-compliance
